Skilled in API integrations

- Payment Gateways, SendGrid, Just Click Pay, Geolocation, Currency Exchange, WhatsApp Cloud API, Facebook Lead Integration, and more.

Basic knowledge of AWS EC2

- Cloud hosting, deployment, and infrastructure management.

Proficient in

- Backend development with a focus on performance, scalability, and security.

PROJECT

Nibble Travo Tech

- This project is a solo endeavour that I developed. This is a travel project with B2C and B2B capabilities, featuring multi-vendor support.
- This project includes lead management, quotation builders, booking management, supplier communication, MIS reports with analytics, accounting, email centralization, marketing tools, chat functionality, client management, markup management, wallet management, complaint handling, and document management.
- API integrations include Flight, Hotel, Payment Gateway, Just Click Pay, Currency Exchange, Geolocation, SendGrid, and more.
- CMS integrated for B2C package management.

Travovortex

- The platform includes CMS, CRM, marketing, accounts, and administration modules, offering a comprehensive solution for managing and streamlining business operations. It supports multiple client types, including agents, customers, suppliers, and staff, enabling seamless collaboration and efficient communication.
- The features of the project include lead management, booking management, analytics, reports, promotional emails, accounting, wallet management, complaint handling, and document management. Additionally, the platform supports seamless communication, client engagement, and transaction tracking, ensuring a smooth and efficient user experience.

Birthday Masti

- Birthday Masti is an in-house cake eCommerce platform designed to offer a delightful selection of cakes for every occasion. With a user-friendly interface, secure payments, and efficient order management, it ensures a seamless and joyful cake-ordering experience.
- This is an in-house eCommerce project.

Flight Fare Deals

- Flight Fare Deals is a flight booking platform tailored for the US market, offering travellers the best airfare deals across domestic and international routes.
- Travology API to provide real-time flight search, fare comparisons, and booking functionality. This API enables seamless access to airline data, ensuring users get the best deals on domestic and international flights with a smooth and secure booking experience.

Nibble and Pixel

- Nibble & Pixel is a dynamic and visually captivating studio eCommerce website designed to showcase and sell creative digital assets, artwork, and design services.
- This is an in-house studio eCommerce project.

DigitalBabaOnline - All in one solution

- I built this website using WordPress, designing key sections such as Home, About Us, Services, and Contact Us under the Privacy section. Additionally, I developed a survey and contact form to enhance user interaction and communication

EDUCATION

Chandigarh University

Bachelor of Computer Applications

Jan 2024 - Dec 2026

BCA (Bachelor of Computer Applications) is a three-year undergraduate degree focusing on computer science, programming, software development, database management, and networking. It prepares students for careers in IT, software development, web development, and system administration.
