WORK EXPERIENCE

Nibble Software Technologies PVT LTD

Laravel Developer   Aug 2022 - Present

- Led a team through a complex audit, ensuring full regulatory compliance.
- Developed and maintained scalable web apps, improving the user experience for 1,000+ users.
- Implemented RESTful services, boosting data retrieval efficiency by 40%.
- Presented technical solutions to stakeholders, simplifying complex concepts and influencing product decisions.
- Optimized code, improving application performance by 30% and reducing load times.

PROJECT

Nibble Travo Tech 🔗

- This project is a solo endeavour that I developed. This is a travel project with B2C and B2B capabilities, featuring multi-vendor support.
- This project includes lead management, quotation builders, booking management, supplier communication, MIS reports with analytics, accounting, email centralization, marketing tools, chat functionality, client management, markup management, wallet management, complaint handling, and document management.
- API integrations include Flight, Hotel, Payment Gateway, Just Click Pay, Currency Exchange, Geolocation, SendGrid, and more.
- CMS integrated for B2C package management.

Travovertex 🔗

- The platform includes CMS, CRM, marketing, accounts, and administration modules, offering a comprehensive solution for managing and streamlining business operations. It supports multiple client types, including agents, customers, suppliers, and staff, enabling seamless collaboration and efficient communication.
- The features of the project include lead management, booking management, analytics, reports, promotional emails, accounting, wallet management, complaint handling, and document management. Additionally, the platform supports seamless communication, client engagement, and transaction tracking, ensuring a smooth and efficient user experience.

DigitalBabaOnline - All in one solution 🔗

- I used WordPress to build this website, creating the Home, About Us, Services, and Contact Us sections under the Privacy section. Additionally, I developed a survey and contact form to allow users to get in touch with us.
